

The unique XML-aware diff/merge tool
for files, directories, and databases

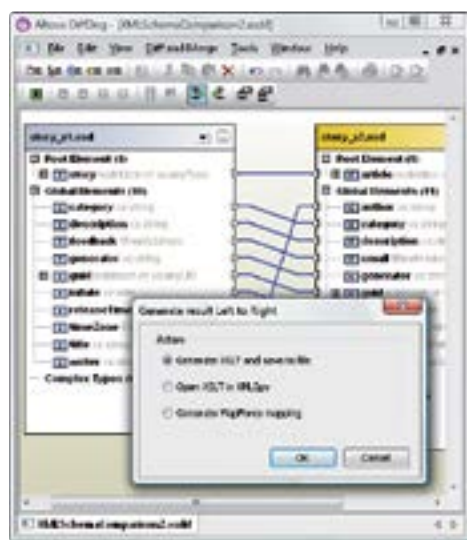

DiffDog Diff/Merge Tool

Altova® DiffDog® 2023 efficiently compares files, directories, and databases and highlights differences in its easy-to-navigate visual interface. Effortlessly diff, merge, update, or synchronize based on any of these comparison modes:

- Compare text files
- Compare XML files
- Compare Microsoft® Word files
- Compare folders and directories
- File and folder comparison with FTP and HTTP servers
- 2- and 3-way diff/merge
- Sync directories in one step
- Merge file differences
- Compare and merge database tables
- Compare XML Schemas and generate transformations
- CSV/database comparisons

DiffDog lets you compare XML or source code files in an instant, then merge changes with a click of the mouse. Quick Comparison allows you to efficiently compare and sync two directories with huge numbers of files. Database table comparison supports comparing and merging table structures or in two versions of a table in the same database type, or similar tables in different database types. Compare XML Schemas, then generate transformations for XML data.
